

## WEB SERVICES PUSH GATEWAY

### ABSTRACT OF THE DISCLOSURE

5           A system and method for interfacing Web Services push applications and mobile terminals operable with one of a plurality of different mobile push technologies. A Web Services push gateway includes a Web Services endpoint to terminate Web Services protocols utilized by the Web Services push applications in providing push messages. A plurality of mobile push bearers are each configured to  
10   communicate with a different one of the plurality of mobile push technologies. The Web Services push gateway includes a push router coupled to the Web Services endpoint to receive the push messages, and to forward the push messages to an elected one of the mobile push bearers, from where is it ultimately delivered to a recipient mobile terminal employing a mobile push technology corresponding to the  
15   elected mobile push bearer.
